

Nature D3™ GRASS

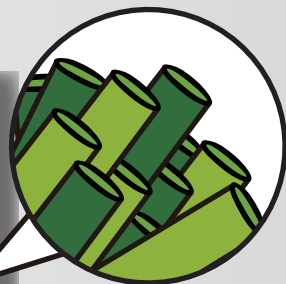

Product Information

Nature D3™ grass looks and touches almost the same as natural grass. The only difference is that Nature D3™ grass always appears green and can be used all year round. It provides the most natural and durable surface for outdoor sports and also for garden landscaping.

Natural Look

Made of high quality extruded monofilament fiber with special technology, Nature D3™ grass is shaped to give the appearance and the superior standing-up quality of natural grass. Different shades of green colors are available for your choice to go with your surroundings.

Durability

The special shape and 170 micron thickness of each individual blade improved the wearing resistance of Nature D3™ product compared with other common monofilament products. The fiber proved to be still very strong and complete even after long term intensive use.

Resilience and Playing Performance

Nature D3™ grass is more resilient and flexible, it returns back to standing state quickly after playing on it. You'll enjoy the seeing, the touching and the experiencing on a Nature D3™ grass surface!

Safety and Environmental Friendly

Optimally engineered and tailored grass system can prevent or reduce injuries like skin abrasions and twisted ankles and knees of the players. Nature D3™ product contains no heavy metals which can do any harm to human health and natural environment.
